

2nd Shift CNC Machinist

Northwest Tool & Mfg. Co., Inc. is seeking motivated individuals to join our team.

Job Description

- CNC Machinist is responsible for creating precision manufactured products efficiently to ensure the highest level of satisfaction for our customers.

Responsibilities

- Set up and operate CNC machines such as lathes and mills.
- Read blueprints.
- Maintain quality and tolerance standards.
- Calculate dimensions or tolerances, using tools including micrometers and calipers.
- Diagnose machine tool malfunctions to determine need for adjustments or repairs.
- Fit and assemble parts to make or repair machine tools.
- Lay out, measure, and mark metal stock to display placement of cuts.
- Maintain machine tools in proper operational condition.
- Measure, examine, or test completed units to check for defects and ensure conformance to specifications, using precision instruments.
- Monitor the feed and speed of machines during the machining process.
- Study blueprints, drawings, or engineering information to determine methods or sequences of operations needed to fabricate products.
- Confer with other machinists to check and ensure that new programs or machinery will function properly and that output will meet specifications.

Requirements

- 1 year of experience in machining.
- Verbal communication skills.
- Strong work ethic.
- Reading and interpreting blueprints.
- Knowledge of CNC setup and machining.
- Knowledge of manual machining is preferred.
- Knowledge of CNC programming is preferred.
- Knowledge of mechanics, metal properties, mathematics, layout, and machining procedures is a plus.

Education Requirements

- High School diploma/GED

Other Details

- Full Time; hours 7am-3:30pm Monday-Friday. Overtime hours may vary.
- Pay is hourly, based upon experience level.
